(54) Title: MEDICAMENT DISPENSER

(57) Abstract: There is provided a medicament dispenser (200) for use in the delivery of a combination medicament product. The dispenser (200) comprises first and second medicament containers (201a, 201b) for containing first and second medicament active component; and first and second release means (216a, 216b) for releasing respective dose portions of the first and second medicament active component from the first and second medicament containers (201a, 201b). The first medicament active component is kept separate from the second medicament active component until the point of release thereof for delivery in combination. The first medicament active component is selected from the group consisting of salmeterol, formoterol and any salts or solvates thereof. The second medicament active component is selected from the group consisting of beclomethasone ester, fluticasone ester and any salts or solvates thereof.
